SUMMARY

Enthusiastic B.Tech graduate in Computer Science (Artificial Intelligence) with hands-on experience in Manual Testing, Functional Testing, Regression Testing, UAT, and defect tracking. Proficient in JIRA, Postman, Selenium WebDriver, SQL, SDLC, and STLC. Skilled in test case design, bug reporting, and ensuring software quality through analytical thinking and problem-solving abilities.

SKILLS

Technical Skills:

Programming Language
- Python
- SQL

Version Control
- Git
- GitHub

Manual Testing
- Functional Testing
- Regression Testing
- Integration Testing
- UAT Testing
- Bug Reporting
- SDLC , STLC
- Retesting

Database
- MySQL
- SQL Queries

Testing Tools
- Jira
- Postman

Automation Testing
- Selenium WebDriver
- API Testing

Methodologies
- Agile
- Scrum

Soft Skills : Problem Solving, Adaptability, Analytical Thinking

WORK EXPERIENCE

Software Test Engineer Intern
June 2025 - July 2025

INSTAGRAM
- Developed a responsive Instagram web clone using HTML, CSS, and JavaScript with features like user authentication and dynamic feed.
- Implemented application logic and basic SQL-based data handling to manage user data and interactions.
- Performed functional, regression, and smoke testing; used JIRA for bug tracking and created RTM, decision tables, and test reports.

PROJECTS

INSTAGRAM
- Developed a responsive Instagram web clone using HTML, CSS, and JavaScript with features like user authentication and dynamic feed.
- Implemented application logic and basic SQL-based data handling to manage user data and interactions.
- Performed functional, regression, and smoke testing; used JIRA for bug tracking and created RTM, decision tables, and test reports.

Pneumonia Detection
- Built a deep learning model in Python using Faster R-CNN with Feature Pyramid Network (FPN) for detecting pneumonia in chest X-ray images.
- Enhanced feature extraction using FPN to preserve spatial accuracy and improve multi-scale detection performance.
- Designed a basic web UI using HTML/CSS to visualize results and predictions.

AI for Smart Farming: Pest & Disease Detection
- Developed an AI-based crop disease detection system using Python, TensorFlow, Keras, and OpenCV for plant disease identification.
- Trained CNN models on the PlantVillage dataset using image preprocessing and augmentation techniques, achieving ~92% validation accuracy.
- Deployed a Flask/Streamlit application for real-time disease detection and treatment recommendations.

EDUCATION

ABES Institute of Technology, Ghaziabad — **2026**
- Bachelor of Technology in Computer Science And Engineering (Artificial Intelligence)

Intermediate - 68.9% — **2021**
- Shanti Vidya Niketan Inter College

High School - 64.5% — **2019**
- Shanti Vidya Niketan Inter College
