SUMMARY

Detail-oriented professional with hands-on experience analyzing business datasets, building KPI dashboards, and extracting actionable insights using Python, SQL, Excel, and Power BI. Skilled in sales analytics, campaign performance analysis, and transforming raw data into structured reports to support data-driven business decisions.

EXPERIENCE

Shamgar Software Solutions **Oct 2025 – Mar 2026**

Data Science Intern

- Applied **Python**, **SQL**, and **data analysis** concepts in a structured internship program.
- Performed **data handling**, **analysis**, and project-based learning under mentor guidance.
- Developed professional communication, business etiquette, and industry collaboration skills.
- Participated in hands-on training covering data science tools, workflows, and practical applications.

Nullclass **Jul 2025 - Aug 2025**

Data Analyst Intern

- Queried and processed 10,000+ transactional records using **SQL** and **Python**, building an interactive **Looker Studio dashboard** to monitor key sales KPIs.
- Performed EDA using **Python (Pandas)** to analyze KPIs such as **Average Order Value** and revenue trends.
- Reduced stakeholder decision-making time by 30% by developing and delivering an interactive data dashboard.

PROJECTS

Multi-Factor Pricing Optimization Framework || *Excel, Optimization, Modeling* GitHub

- Designed a **rule-based pricing engine** analyzing **50 SKUs**, integrating **cost structure, demand signals, inventory health**, and **competitive benchmarks**.
- Generated pricing recommendations adjusting **84%** of the catalog (42 increases, 8 decreases) while maintaining **100% margin floor protection**.
- Achieved an average price optimization of **+10.65%**, identifying maximum upside potential of **+56.89%** across high-opportunity SKUs.

Sales Analytics Dashboard || *Looker Studio, SQL, Python, Pandas, Seaborn* GitHub

- Developed a **Looker Studio dashboard** to visualize sales KPIs (AOV, profit trends) for stakeholders.
- Cleaned and transformed over **10,000 rows** of transactional data using **SQL** and **Python (Pandas)**.
- Reduced stakeholder decision-making time by **30%** by centralizing key business metrics.

Housing Market Analysis || *Python, EDA* GitHub

- Analyzed **1000+** real estate records, identifying **40%** regional price variation
- Performed **end-to-end analysis** using 5+ tools (Pandas, NumPy, Matplotlib, Seaborn, Plotly).
- Identified strong size–price **correlation (0.7)** to support data-driven insights

SKILLS

- **Core Skills**: Python, SQL, Power BI, Advanced Excel (VLOOKUP, Pivot Tables)
- **Data Analysis**: EDA, KPI Analysis, Data Cleaning, Statistics, ETL
- **Data Visualization**: Power BI, Tableau, Looker Studio, DAX, Power Query
- **Databases & Tools**: MySQL, PostgreSQL, Git, Jupyter Notebook, VS Code, Google Sheets

TRAINING

Capgemini Centre of Excellence in Skilling, NSEZ Noida **Jan 2026 - Mar 2026**

Data Analytics Trainee

Completed industry-aligned training in Data Analytics, Business Reporting, Data Visualization, and Data-Driven Decision Making using analytical tools and reporting techniques.

EDUCATION

IMS Engineering College **Aug 2022 - June 2026**

B.Tech in Computer Science *CGPA: 6.72*
