ABOUT ME

I am a motivated Electronics and Communication Engineering undergraduate at JSS Academy of Technical Education, Noida, with a strong foundation in core engineering principles and modern technologies.
I possess proficiency in C, Python, MATLAB, and Simulink, along with a keen interest in embedded systems and communication domains.
I am known for my problem-solving ability, disciplined approach, and effective time management skills.
I bring strong communication, leadership, and teamwork capabilities developed through active involvement in technical and cultural societies.
I am adaptable, quick to learn, and consistently strive to improve both my technical and interpersonal skills.
I aim to leverage my knowledge and skills to contribute meaningfully in dynamic and growth-oriented environments.

EDUCATION

JSS Academy Of Technical Education, Noida, UP **Nov. 2022 - Aug. 2026**
Bachelor of Technology in Electronics and Communication Engineering

PROJECTS

Line Following Robot (LFR)

- Built an autonomous robot using Arduino and IR sensors to follow a predefined path, focusing on real-time control and sensor integration.
- Collaborated with IEEE team members, gaining hands-on experience in embedded systems, motor control, and basic automation concepts.

Drone (Air Bot Showdown)

- Designed and assembled a quadcopter using flight controllers, ESCs, and brushless motors for a technical competition.
- Worked as part of the IEEE team to configure flight stability, remote control systems, and understand UAV dynamics

Tic Tac Toe LED Grid with Laser-Cut PCB

- Designed PCB in EasyEDA, engraved using EZCAD laser machine. Created a 3x3 LED matrix that plays Tic Tac Toe automatically

Automatic Car Parking System

- Designed an automated car parking model using Arduino, IR sensors, and motor drivers to detect empty slots and park the vehicle accordingly.
- Implemented sensor-based decision-making logic for real-time slot detection and precise motor control.
- Integrated LED indicators to display the number of vacant and occupied parking slots in real-time.

Design of MSP Antenna at 3.4 GHz using HFSS

- Designed and simulated a Microstrip Patch Anterina (MSP) at 3.4 GHz using HFSS, optimized for wireless communication. applications
- Used Rogers RT/duroid substrate for high-frequency performance, focusing on return loss, bandwidth, and radiation pattern analysis

Simulation of Circular Microstrip Patch Antenna

- Published a Research Paper for Designing and Simulating of Circular Microstrip Patch Antenna for Biomedical Applications using DFS, IEEE ICSETI 2026

INTERNSHIP

- Summer intern at INDIAN RAILWAYS
- Procurement Intern at ISM

TECHNICAL SKILLS

C Language	Simulink	Antenna
Python	DSA	EasyEda
MATLAB	Mircrocontroller	PCB Design

LEADERSHIP/VOLUNTEERING

- **Fest Secretary at ZEALICON official techno Culture Fest of JSSATEN**
- **Core Team Chief of Spade The Physics Society JSSATEN**
- **Head of Management at Origo Society of English Literature JSSATEN**
- **General Secretary at Tenacious The Esports and Animation Society-JSSATEN**
- **Head of Security at YFAC-NGO JSSATEN**
