SANJU VERMA

Data Analyst | Business Analyst | SQL Analyst | BI Analyst

Jaipur, Rajasthan, India | vermaa.sanju321@gmail.com | +91-8955665366 | linkedin.com/in/sanju123 | github.com/SanjuVerma123

PROFESSIONAL SUMMARY

Fresher Data Analyst with hands-on experience in Python, SQL, Excel, Power BI, and Tableau. Skilled in data cleaning, EDA, statistical analysis, ETL, data modeling, and dashboard development. Delivered 3+ data analytics projects processing 70,000+ records, improving reporting efficiency by 30% and achieving up to 82% model accuracy. Completed virtual internships with TATA, Deloitte, and British Airways in data analytics and data visualization.

CORE SKILLS

Programming & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL, SQL Server), DBMS

Data Analytics: Data Cleaning, Data Wrangling, Data Modeling, EDA, Statistics, Hypothesis Testing, Regression Analysis

Visualization & BI: Power BI, Tableau, Looker Studio, Excel (Pivot Tables, Power Query, Dashboards), KPI Reporting, Business Intelligence

Machine Learning: Predictive Modeling, Feature Engineering, Classification, Scikit-learn, Model Evaluation

Tools & Platforms: Jupyter Notebook, Git, GitHub, ETL, Data Warehousing, MS Excel, Google Sheets, MS Office

Soft Skills: Problem Solving, Analytical Thinking, Business Communication, Stakeholder Collaboration, Attention to Detail

PROJECTS

Sales Data Analysis Dashboard | *Power BI, Excel, SQL, Data Visualization*

- Analyzed 50,000+ sales records using SQL and Power BI, identifying revenue trends and profit drivers across 5+ regions.
- Built interactive Power BI dashboards with 10+ KPIs, dynamic slicers, and drill-down features for region- and product-wise tracking.
- Improved sales visibility by 18% and cut manual reporting time by 30%, accelerating data-driven decisions for management.

Customer Churn Prediction | *Python, Pandas, NumPy, Scikit-learn, ML*

- Cleaned, preprocessed, and engineered features on 20,000+ customer records, reducing data inconsistencies by 25%.
- Built Logistic Regression and Decision Tree models achieving 82%+ accuracy in predicting customer churn risk.
- Visualized churn patterns using Matplotlib and Seaborn; insights projected to reduce churn by 15% via targeted retention.

HR Analytics Dashboard | *Excel, Power BI, KPI Reporting*

- Analyzed workforce data of 1,400+ employees covering attrition trends, demographics, and performance KPIs.
- Designed real-time dashboards tracking headcount, attrition rate, and workforce planning efficiency.
- Reduced HR reporting gaps by 20% and informed employee retention strategy with actionable insights.

INTERNSHIP / VIRTUAL EXPERIENCE PROGRAMS

TATA — GenAI Powered Data Analytics | *Forage Virtual Experience*

- Performed AI-assisted business data analysis on real datasets using generative AI tools and techniques.
- Built 3+ KPI dashboards from the analysis, reducing overall reporting time by 20%.

Deloitte — Data Analytics | *Forage Virtual Experience*

- Conducted end-to-end data cleaning and trend analysis on 10,000+ records for a client business case.
- Delivered 5+ actionable business insights that directly supported client decision-making.

British Airways — Data Science | *Forage Virtual Experience*

- Performed EDA on customer feedback data to uncover key operational and behavioral patterns.
- Developed predictive classification models achieving 78%+ accuracy to support data-driven reporting.

EDUCATION

B.Tech in Computer Science & Engineering | Vivekananda Institute of Technology, Jaipur, Rajasthan | 2022 – 2026

Relevant Coursework: DBMS, Statistics, Data Mining, Machine Learning, Business Intelligence, Data Visualization, Python Programming, Data Structures

CERTIFICATIONS & ACHIEVEMENTS

- TATA — GenAI Powered Data Analytics, Forage (Virtual Experience Certificate)
- Deloitte — Data Analytics Job Simulation, Forage (Virtual Experience Certificate)
- British Airways — Data Science Job Simulation, Forage (Virtual Experience Certificate)
- Delivered 3+ end-to-end data analytics projects processing 70,000+ records spanning EDA, ML modeling, and BI dashboard reporting.
