CHAVI KOHLI

Data Science & Analytics | AI | Business Intelligence

+91-9368959006 | Chavikohli72@gmail.com | Delhi NCR | linkedin.com/in/chavikohli

PROFESSIONAL SUMMARY

Results-driven Data Science & AI Analyst with hands-on experience in machine learning, predictive modelling, SQL-based data analysis, and business intelligence dashboards (Power BI / Tableau). Proficient in Python (Pandas, NumPy, Scikit-learn, Matplotlib) and skilled in end-to-end data pipelines — from data wrangling and EDA to model deployment and KPI reporting. Strong foundation in statistical analysis, feature engineering, and data-driven decision-making. Currently pursuing B.Com at Bharati College, Delhi, with a passion for solving real-world business problems through AI and analytics.

TECHNICAL SKILLS

Programming & Query Languages	Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow basics) · SQL (MySQL, PostgreSQL) · R (basics)
Machine Learning & AI	Supervised & Unsupervised Learning · Regression, Classification, Clustering · Feature Engineering · Model Evaluation (RMSE, AUC, F1) · NLP basics · Deep Learning basics (ANN, CNN)
Data Visualisation & BI Tools	Power BI · Tableau · Excel (Pivot Tables, VLOOKUP, Charts) · Google Data Studio · Matplotlib / Seaborn
Data Analytics & Statistics	Exploratory Data Analysis (EDA) · Descriptive & Inferential Statistics · A/B Testing · KPI Tracking · Predictive Analytics · Business Intelligence
Database & Big Data	SQL Queries, Joins, Subqueries, Stored Procedures · MySQL · Data Cleaning & Transformation
Digital Marketing & Web Analytics	Google Analytics (GA4) · SEO & SEM · Campaign Performance Analysis (CTR, CPC, ROAS, Conversions) · Social Media Analytics · Content Strategy
Other Tools & Platforms	Google Analytics · Canva · MS Office Suite · GitHub (version control basics) · Jupyter Notebook · VS Code

WORK EXPERIENCE

Data Science & Digital Marketing Analyst | Self-employed / Freelance | *2026*

- Led end-to-end data analysis projects using Python (Pandas, NumPy) and SQL to extract actionable business insights from large datasets.
- Built and evaluated supervised machine learning models (Linear Regression, Random Forest, Decision Tree) for prediction and trend analysis.
- Automated data cleaning, transformation, and reporting pipelines using Python scripts, reducing manual effort by ~40%.
- Designed interactive Power BI / Tableau dashboards to track KPIs, sales trends, and campaign performance metrics.
- Optimised digital marketing campaigns using data-driven A/B testing strategies, improving CTR and conversion rates.

Digital Marketing Intern | Sky Elite Aviation Academy | *2025 – 2026*

- Planned and executed social media marketing campaigns across Instagram, LinkedIn, and Facebook, achieving measurable growth in engagement.
- Analysed campaign performance using Google Analytics — tracked traffic sources, bounce rates, engagement, and conversion funnels.
- Created and scheduled SEO-optimised content aligned with brand strategy and target audience personas.
- Leveraged customer behaviour data and analytics insights to refine targeting and improve campaign ROI

PROJECTS

House Price Prediction – Machine Learning Model *[Python · Scikit-learn · Pandas · Matplotlib]*

- Built a regression model to predict house prices using features like area, location.
- Performed feature engineering, handled missing values, and applied label encoding & scaling.
- Evaluated model performance using RMSE, R^2 score, and cross-validation; achieved strong predictive accuracy.
- Visualised feature importance and prediction results using Matplotlib and Seaborn.

Sales Data Analysis Dashboard *[Python · SQL · Power BI / Tableau · Excel]*

- Analysed 10,000+ rows of sales data using Python (Pandas) and SQL to uncover revenue trends and customer behaviour patterns.
- Identified top-performing products, seasonal demand spikes, and regional sales gaps.
- Built interactive dashboards in Power BI with slicers, KPI cards, and time-series charts for business stakeholders.

Marketing Campaign Performance Analysis *[Google Analytics · Python · Excel]*

- Evaluated multi-channel campaign performance using Google Analytics data — analysed CTR, conversion rate, CPC, and ROAS.
- Performed cohort analysis and funnel analysis to identify drop-off points in the customer journey.
- Provided data-backed recommendations that improved campaign efficiency and reduced cost per acquisition.

EDUCATION

Bachelor of Commerce (B.Com) | Bharati College, University of Delhi, Janakpuri | *2025 – Present (Ongoing)*

12th – CBSE (Class XII) | MRV Model School, Tilak Nagar, New Delhi | *2024 – 25*

10th – CBSE (Class X) | MRV Model School, Tilak Nagar, New Delhi | *2022 – 23*

CERTIFICATIONS

- Data Science & Machine Learning Certification
- Digital Marketing Certification
