Sanvi Agarwal

8630122769 | agarwalsanvi004@gmail.com | LinkedIn | GitHub | Leetcode

Technical Skills

Languages: Python, Java, Kotlin, C++, HTML5, CSS3, JavaScript, React.js, SQL
Core Computer Science: DSA, OOP, OS, DBMS, Computer Networks, Distributed Systems, System Design
Frameworks & Technologies: Spring Boot, Hibernate, Maven, RESTful APIs, MySQL, PostgreSQL, MongoDB, Redis
Cloud, DevOps & Tools: AWS (CloudWatch, CDK, FIS, SSM, EMR, S3), Grafana, Git, CI/CD, Docker, Kubernetes, Gen AI, Agile, Power BI, Google Workspace, Excel, TestNG, Mockito, Log4j

Education

Manipal University Jaipur, Jaipur: B.Tech in Computer Science and Engineering (2022–26), CGPA: 9.91
Hartmann College, Bareilly: 10th ICSE – 95.4% (2019–20), 12th ISC – 97% (2021–22)

Work Experience

SDE Intern | Kotlin, Python, AWS CDK, AWS FIS, AWS SSM, Gremlin ***Amazon*** *(Jan 2026 – Jun 2026)*

- Developed **Konton**, a pipeline-integrated chaos engineering framework that automated resilience validation for distributed CloudWatch Logs services, supporting **20+ fault types**, **35+ automated scenarios**, and integration across **4 services** in **6 CI/CD pipelines**.
- Built an **AI-powered onboarding agent** with **15 domain-specific skills** and **6 SOPs** that generated service-specific chaos test code and framework configurations from architecture descriptions, reducing service onboarding time from **weeks to less than one day**.
- Designed and implemented the **Konton CLI** with **16 reusable experiment templates**, automated HTML resiliency reporting, and production-safe validation workflows, enabling repeatable gameday execution and deployment gating while minimizing customer impact.

SDE Intern | PySpark, AWS EMR, S3, Apache Airflow, MySQL, Kubernetes ***Razorpay*** *(Aug 2025 – Dec 2025)*

- Optimized **distributed data processing pipelines** for reconciliation workflows using PySpark on AWS EMR, improving query execution time by **20–50%** through predicate pushdown, partition pruning, and query optimization, reducing compute and I/O overhead.
- Improved ingestion reliability by implementing robust data validation and multi-format date parsing across banking workspaces, reducing ingestion failures and resolving **50+ production support tickets**.
- Enhanced reconciliation workflow stability by debugging data inconsistencies, optimizing reconciliation APIs, and streamlining distributed data-fetch processes to reduce manual intervention.

Full Stack Intern | React.js, NestJS, PostgreSQL, AWS S3 ***Impulsive Web*** *(May 2025 – Aug 2025)*

- Developed a Kahoot-style **real-time multiplayer quiz platform** using React.js and NestJS with live gameplay, synchronized question delivery, and real-time score tracking.
- Built **RESTful APIs** and implemented **JWT-based authentication** with **role-based access control (RBAC)**, supporting secure user management, instant answer evaluation, and live question updates.

Projects

CodeXpert | Java, Python, Spring Boot, REST APIs, Jupyter Notebook Feb-April 2025

- Designed and implemented **a full-stack Code Error Detection System** integrating Spring Boot and **DeepSeek Coder Instruct LLM for real-time syntax and logical error** detection in **Java, Python and C++**.
- Built a **modular microservices** architecture with a **Spring Boot backend handling UI communication** and **routing requests to a FastAPI service** hosted on Jupyter Notebook, which invokes the LLM.

Achievements & Certifications

Modified Multi-Branch Federated Transformer Model for Privacy-Preserving Phishing Email Detection
Published in Journal of Discrete Mathematical Sciences and Cryptography (2026)

Oracle Cloud Infrastructure 2025 Certified Architect Associate

AWS Academy Graduate - AWS Academy Cloud Foundations

DSA in Java - NPTEL (Rank in Top 1% with Elite Golden Badge for scoring 94%)

MUJ Dean's List Award (Excellence in Academics for highest GPA in all semesters.)
