Profile summary

Results-driven Java Backend Developer with over 1 year of experience designing and deploying enterprise-grade microservices at Volvo Group. Proficient in Java, Spring Boot, Docker, RedHat OpenShift, IBM MQ, and CI/CD pipelines with hands-on knowledge of PostgreSQL, Hibernate and Spring Security. Strong full-stack capabilities using React.js for frontend development. Experienced in Agile/Scrum environments and DevSecOps practices, focused on building secure, scalable backend systems and improving deployment reliability.

Skills

Java | Spring Boot | Microservices | RESTful API Design | Docker | RedHat OpenShift | IBM MQ | CI CD Pipeline | Postgresql | Hibernate | Spring Security | React.js | JavaScript | HTML5 | CSS3 | RDBMS | MySQL | Python | SDLC Life Cycle | JUnit | GIT | Github | Github Actions | Agile Methodology | Scrum Agile Development Methodology | SQL | Jdbc

Certifications

- Certificate For Completion Of Java Training
- JUnit & Mockito — Udemy
- Multithreading, Concurrency & Performance — Udemy
- AI Tools & Prompting
- Cloud DevOps Workshop — GUVI / HCL

Work Experience

Software Java Engineer — Volvo Group **Apr 2025 - Apr 2026**

- Designed and developed Spring Boot microservices for enterprise-scale production backend systems handling high-volume transactions.
- Built and maintained RESTful APIs with business logic, input validation, exception handling, and comprehensive unit tests using JUnit and Mockito.
- Integrated IBM MQ for asynchronous messaging and event-driven communication between microservices.
- Containerized applications using Docker and deployed on RedHat OpenShift (Kubernetes) clusters, improving deployment reliability.
- Contributed to CI/CD pipelines enabling automated build, test, and deployment workflows, reducing release cycle time.
- Implemented DevSecOps practices including SonarQube code quality scans and Software Composition Analysis (SCA) for security compliance.
- Configured and managed HazelCast distributed caching to improve application performance.
- Participated in Agile Scrum ceremonies — sprint planning, daily standups, reviews, and retrospectives to foster team collaboration.

— QSpiders **Aug 2024 - Apr 2025**

- Undertook full-stack training with practical projects using Core/Advanced Java, Spring Boot, Hibernate, MySQL, React.js, HTML, CSS, and JavaScript.
- Implemented CRUD functionality, REST API integration, and collaborated on project deliverables and documentation.

Internships

— QSpiders / JSpiders Training Institute **8 Months**

- Undertook full-stack training with practical projects using Core/Advanced Java, Spring Boot, Hibernate, MySQL, React.js, HTML, CSS, and JavaScript.
- Implemented CRUD functionality, REST API integration, and collaborated on project deliverables and documentation.

INTERNSHIP COURSE MANAGEMENT — **31 Days**

- Maintained web applications and contributed to performance improvements and feature implementations as part of a team.

Projects

Spring Boot Security with JPA **4 Months**

- Implemented authentication and authorization using Spring Security with a DAO AuthenticationProvider and BCryptPasswordEncoder.
- Developed a custom UserDetailsService mapping JPA User entities to Spring Security authorities and exposed role-protected REST endpoints.
- Set up GitHub Actions CI/CD workflows for automated testing and packaging.

FamilyFinanceDB App **4 Months**

- Developed a personal finance management application using Spring Boot and MySQL for tracking income and expenses.
- Implemented RESTful APIs for CRUD operations with Spring Data JPA, input validation, and structured error handling.

Student Management System **4 Months**

- Created a full-stack CRUD application with React.js frontend, Spring Boot backend, and PostgreSQL database.
- Used React Hooks and React Router for state management and navigation.

IMDB Movies Clone **4 Months**

- Built a responsive movie browsing application using React.js and TMDB API via Axios to display movie details, ratings, and search results.
- Implemented React Router for SPA navigation and pagination to handle large datasets.

StudentDB App **0 Days**

- Developed using Spring MVC with persistence features, employing annotations, EntityManagerFactory and JSP for the UI.

ActorMovieDB App **0 Days**

- Developed using Hibernate and JPA with focus on persistence, CriteriaBuilder and HQL for data operations.

Education

B.Tech / B.E. | Computer Science and Engineering (CSE) **2024**
Kls vdit
Grade - 8.38/10

12th **2020**
Karnataka, English
Marks - 81%

10th **2018**
Karnataka, English
Marks - 83%

Extra-curricular activities

Technical Workshops & Training

Participated in and completed multiple technical workshops and training programs including Cloud DevOps and Java Full Stack courses to enhance practical engineering skills and industry readiness.

Achievements

Certifications & Training

Completed industry-relevant certifications including JUnit & Mockito, Multithreading & Concurrency, AI Tools & Prompting, Cloud DevOps Workshop, and Java Full Stack Development.

Additional information

Languages: English, Hindi, Kannada, Marathi, Konkani
