ARYAN KUMAR SINGH

CYBERSECURITY ANALYST | SOC ANALYST | SECURITY OPERATIONS

Greater Noida, Delhi-NCR | +91 8368885832 | AryanSingh2887@gmail.com | linkedin.com/in/aryan-kumar-singh-249063278/

PROFESSIONAL SUMMARY

Entry-level Cybersecurity Analyst and BCA Cloud & Security graduate with nearly one year of structured practical training as a student and practitioner at Craw Security. Hands-on laboratory exposure includes SOC monitoring, SIEM and log-analysis fundamentals, security-alert triage, incident investigation, network traffic analysis, vulnerability assessment, web-application security testing, evidence collection and remediation reporting. Completed 40+ simulated security scenarios and 30+ documented web-security tests using Windows, Linux, Wazuh, Wireshark, Nmap and Burp Suite. Brings analytical problem-solving, clear documentation, confidentiality and a disciplined learning mindset.

CORE SKILLS

Security Operations: SOC monitoring, SIEM/Wazuh fundamentals, alert triage, log analysis, incident response, event investigation, escalation, IOC and evidence analysis

Network & System Security: TCP/IP, DNS, DHCP, subnetting, VLANs, routing and switching fundamentals, HTTP/HTTPS, Windows, Linux/RHEL 9, Wireshark and Nmap

Vulnerability & Application Security: Vulnerability assessment, OWASP Top 10, web/API testing fundamentals, Burp Suite, Metasploit, risk rating, remediation and retesting

Scripting, Reporting & Tools: Python and Bash basics, incident documentation, technical reporting, MITRE ATT&CK, Cyber Kill Chain, Microsoft Excel, Word and PowerPoint

Professional Strengths: Analytical thinking, troubleshooting, communication, teamwork, attention to detail, confidentiality, ownership and adaptability

PRACTICAL CYBERSECURITY TRAINING

Cybersecurity Student & Practitioner | Craw Security, Delhi **Aug 2025 - Present**

- Investigate simulated endpoint, network and web-security events; review logs and traffic, collect evidence, assess severity and document findings in an incident-oriented format.
- Practice alert triage, incident-response workflows, vulnerability validation and escalation while identifying affected assets, security impact and required containment actions.
- Use Wazuh, Wireshark, Nmap, Burp Suite and Metasploit in authorized labs to analyse suspicious activity and strengthen defensive-security understanding.
- Prepare structured reports containing technical evidence, risk ratings, business impact, remediation guidance, responsible actions and retesting results.

SELECTED PROJECTS

SOC Monitoring & Incident-Response Home Lab **2026**

- Built a virtualized multi-system lab with Windows and Linux hosts to study security events, network traffic, endpoint activity and log visibility.
- Completed 40+ simulations covering reconnaissance, password attacks, suspicious network activity and privilege-escalation indicators; mapped observations to MITRE ATT&CK and produced remediation-focused reports.

Network Traffic Analysis & Service Enumeration Lab **2026**

- Captured and filtered authorized lab traffic with Wireshark to examine DNS, TCP/UDP and HTTP/HTTPS activity, identify unusual connections and document investigation observations.
- Used Nmap to enumerate lab hosts, ports and services; reviewed exposed services and configurations and prepared concise security-risk and remediation notes.

Web Application Vulnerability Assessment Lab **2026**

- Executed 30+ authorized tests against DVWA and OWASP Juice Shop covering SQL injection, XSS, IDOR, authentication weaknesses, file-upload risks, session issues and business-logic flaws.
- Used Burp Suite and manual validation to reproduce findings, capture evidence, assign risk, explain impact and recommend remediation and retesting actions.

CERTIFICATIONS & TRAINING

Cybersecurity: Certified Ethical Hacker (CEH) - Craw Security; Advanced Penetration Tester (APT) - Craw Security; Practical Approach of Cyber Security - TCS iON

Systems & Technical: RHEL 9 Linux Administration - Craw Security; Networking Fundamentals - Craw Security; Python Basics - Craw Security

Additional: AI Foundation - IIT Mandi iHub & HCi Foundation; Advanced Excel - Amity University

Credentials listed above represent training/course completion; CEH and APT were completed through Craw Security and are not official vendor certifications.

EDUCATION

Bachelor of Computer Applications - Cloud & Security | Amity University Online | CGPA: 7.00 **2023 - 2026**

Cyber Security Diploma | Craw Security, Delhi | Current CGPA: 8.50 (Ongoing) **Aug 2025 - Present**

ADDITIONAL EXPERIENCE

Independent Tutor & Academic Mentor | Self-Employed, Greater Noida **2024 - Present**

- Manage multiple learner schedules, explain complex concepts clearly, maintain progress records and coordinate consistently with students and parents.

ADDITIONAL INFORMATION

Languages: English and Hindi

Availability: Full-time; open to rotational shifts, Delhi-NCR opportunities and relocation for a suitable Cybersecurity, SOC, NOC or Network Support role
