Summary

Motivated B.Tech Computer Science and Engineering student with hands-on experience in AI/ML engineering, cloud architecture, and DevOps practices. Proven track record in building scalable full-stack applications, optimizing cloud infrastructure, and training deep learning computer vision models through professional internships.

Education

- **Vignan Institute of Technology and Science** **2023–2027**
  B.Tech in Computer Science and Engineering *CGPA: 9.17*
- **Sainik School Korukonda** **2022–2023**
  CBSE Class XII *86%*
- **Sainik School Korukonda** **2019–2020**
  CBSE Class X *88%*

Technical Skills

Languages: Python, Java, C, SQL
Databases: MySQL, SQLite, Oracle 10g
Cloud & DevOps: AWS Lambda, Amazon EC2, Docker, Jenkins, GitLab CI, Cron Jobs
Frameworks & Tools: Reactjs, Nodejs, Git, GitHub, REST APIs
AI/ML & Data: TensorFlow, PyTorch, OpenCV, NumPy, Matplotlib, Tableau
CS Fundamentals: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP)

Experience

- **Railways Intern** **Jul 2026 – Present**
  Rail Nilayam
  – Developed an automated Car Parking System utilizing MySQL to optimize railway parking slot allocation.
  – Enhanced the localized digital booking system for the Rail Nilayam Auditorium, accelerating processing efficiency for event scheduling by 15%.
- **AI/ML Intern** **May 2026 – June 2026**
  Raritone
  – Developed high-accuracy virtual try-on modules leveraging DeepFashion2 datasets, OpenCV, TensorFlow, and PyTorch.
  – Led critical AI/ML research initiatives and coordinated team-wide development of production-ready computer vision solutions to scale real-time rendering accuracy by 20%.
- **AWS Cloud Engineer** **Sep 2025 – Jan 2026**
  EdiGlobe
  – Built and managed scalable AWS infrastructure utilizing AWS Lambda, Docker, and Jenkins for robust DevOps automation.
  – Deployed and optimized cloud applications to maximize high availability, boosting system uptime to 99.9% and saving 12% in operational cloud costs.

Projects

- **Car Parking System:** Built an automated real-time slot allocation system using Python and MySQL.
- **Placement Portal:** Developed a full-stack campus recruitment platform utilizing Reactjs and Nodejs backend.
- **Hospital Management System:** Programmed a secure patient record database dashboard using Java and OOP principles.
- **IMDb Analysis:** Engineered data processing pipelines to analyze cinematic trends using NumPy and Tableau.
- **Finance Chatbot:** Trained an AI-driven conversational agent powered by algorithmic financial reasoning workflows.
- **Food Bridge:** Designed a web application using REST APIs to efficiently redistribute surplus food items.

Certifications

- Algorithms in Computational Biology
- Data Structures and Algorithms (DSA) in Java
- Introduction to Python Programming
- Amazon Web Services (AWS) Cloud Architecture
- Tableau 360 Data Visualization Masterclass

Soft Skills & Core Competencies

Problem Solving • Team Collaboration • Adaptability • Fast-Paced Environment Execution

Languages

English (Professional) • Hindi • Telugu (Native)
