Manik Arora

+91 8445881647 | [workwithmanik.in@gmail.com] | linkedin.com/in/manikarora6601 | github.com/Manik6601

Summary

- AI & Machine Learning graduate with hands-on experience in machine learning, NLP, full-stack development, and data analytics. Built real-world applications using Python, FastAPI, React, and Flutter. Participated in multiple hackathons and contributed to AI-focused research projects involving sentiment analysis, personality trait detection, and predictive modeling.

Education

Sharda University — Greater Noida, Uttar Pradesh
Bachelor of Computer Applications in AI & ML — *2023 – 2026*

Amity University ONLINE — Noida
Masters of Computer Applications in AI & ML — *2026 – 2028*

Projects

Business Management App | *Flutter, FastAPI, Firebase* — 2025 – Present
- Developed a business management platform for a pest control company to streamline technician assignment and field operations.
- Implemented technician job assignment with location tracking and monitoring features.
- Built a revenue analytics module to analyze business performance and generate operational insights.
- Integrated FastAPI backend services with Firebase for real-time data management.

Full Stack Weather App | *React, FastAPI, OpenWeatherMap API, OpenCage API* — 2025 – Present
- Developed a weather application with geolocation-based forecasting and city search functionality.
- Integrated external APIs for weather data and reverse geocoding services.
- Designed a responsive user interface using React and Tailwind CSS.

Email Spam Detection System | *Python, Scikit-learn, NLP* — 2025 – 2026
- Built an email spam classification model using Logistic Regression and NLP techniques.
- Performed text preprocessing, feature extraction, and model evaluation.
- Improved classification performance through feature engineering and optimization.

Game Recommendation System | *Python, Pandas, Scikit-learn* — 2025
- Built a recommendation engine using a Steam dataset containing over 97,000 games.
- Implemented similarity-based recommendations using gameplay, genre, and review features.
- Applied machine learning and feature engineering techniques to improve recommendation quality.

Technical Skills

Languages: Python, Java, SQL, JavaScript, C, R

Frameworks: FastAPI, Flask, React, Flutter, Tailwind CSS

Machine Learning: Supervised Learning, Unsupervised Learning, NLP, Classification, Regression, Feature Engineering, Model Evaluation, Recommendation Systems, Deep Learning, Neural Networks, LLMs, Prompt Engineering, Explainable AI

Libraries: Scikit-learn, Pandas, NumPy, Matplotlib, Transformers

Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebook, Firebase, Figma

Certifications

Developing AI Applications with Python and Flask – IBM (Coursera, 2025)

Machine Learning – IBM (Coursera, 2025)

Python Basics – UpGrad (2025)

Data Mining and Data Warehousing – NPTEL (2025)

TCS iON Career Edge – TCS (2025)
