Skills

- Core-Java
- Advance Java
- C
- HTML
- CSS
- Bootstrap
- Data-Structures
- SQL

Projects

Foodbox
- Created a FoodBox project, which is a particular restaurant's backend using advanced Java concepts (Servlets, Request Dispatcher, JSP, URL Rewriting, MVC).
- I want to develop a web application so that nearby clients can order food, and the food can be delivered to them.

Todo Application
- Build a To-Do List GUI application using Apache NetBeans (drag and drop) and Java Swing.
- A mini application in which you can add tasks and delete a particular task, utilizing file handling.

Flipkart Clone
- Developed a Flipkart clone using a front-end stack comprising HTML, CSS, and JavaScript.
- The project encompasses features such as user authentication with both sign-in and sign-up functionalities, implemented using JavaScript.
