KSHITIZ SINGH

singhkshitiz2005@gmail.com | +91 9369344307 | Delhi | LinkedIn | Github

PROFILE SUMMARY

"Aspiring Data Scientist with a strong technical foundation in building intelligent AI solutions and predictive models. Experienced in implementing NLP workflows, computer vision techniques, and complex ETL processes. Adept at leveraging the Python ecosystem (Pandas, NumPy, Seaborn) and managing both SQL and NoSQL databases to streamline data ingestion and analysis. Committed to deploying scalable AI projects that solve real-world operational challenges.".

SKILLS

Programming: Python, SQL
Analytics: MS Excel (Advanced), Pandas, NumPy
ML / AI: Scikit-learn, TensorFlow/Keras, Qiskit, TF-IDF, TinyLlama (LLM integration), Prompt Engineering (LLM optimization & design)
Tools & Cloud: Git, GitHub, Jupyter Notebook,Power Bi , Google Colab, FastAPI, Streamlit
Professional: Team Leadership, Deadline Management, Cross-functional Collaboration, Technical Communication
Personal: Quick Learner, Adaptive, Dedicated

INTERNSHIP EXPERIENCE

Data Engineer Intern | Coginfyz | 2 Months | 2026 | Remote

- Conducted EDA, standardized schema strings, and developed ETL transformations using filtering, aggregations, and derived features to ensure data integrity.
- Identified temporal trends, analyzed statistical correlations, and created KPI-driven Matplotlib/Seaborn visualizations supporting actionable business recommendations and stakeholder decision-making.

Data Analytics Intern | Novi Tech | 1 Months | 2026 | Remote

- Developed interactive Power BI and Tableau dashboards, managed SQL and MongoDB databases, enabling efficient retrieval, structured storage, and actionable business insights.
- Engineered Python data pipelines and applied Machine Learning and Deep Learning models for cleaning, predictive forecasting, trend identification, and strategic reporting.

Data Science Intern | Evoastra Ventures | 3 Months | 2026 | Remote

- Developed a Global Trade and Risk Intelligence System, analyzing trade patterns, identifying potential risks, and applying data science techniques for trend analysis and risk assessment.
- Performed data collection, cleaning, and analysis, delivering actionable insights supporting data-driven decision-making through analytical approaches.

PROJECTS

Customer Churn Prediction System

- Built an end-to-end ML pipeline using XGBoost to predict telecom churn with [80]% accuracy, identifying key drivers like contract type and charges.
- Optimized performance by evaluating multiple models (Random Forest, Logistic Regression) and engineering high-impact features.
- Deployed an interactive Streamlit app for real-time risk assessment and business insights into customer retention.

EDUCATION

Bachelor of Computer Applications (BCA) (Hons.), 2024 - 2027
Vivekananda Global University

CERTIFICATIONS

- AI/ML For Geodata Analysis (IIRS , ISRO) - AUG 2024
- Pantech AI Internship – FEB 2026

EXTRA CURRICULAR ACTIVITIES

- Smart India Hackathon (SIH) — Built an ERP system to solve college administrative issues; led AI chatbot integration to automate student queries using intent classification and dialog management (Rasa), contributing to a working prototype and
