Professional Summary

Full Stack Developer with hands-on experience building end-to-end MERN applications using React.js, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs, implementing JWT authentication, deploying production-ready applications, and evaluating AI models through structured quality assessment during an AI post-training internship.

Technical Skills

Languages: Python, JavaScript, Java, C, TypeScript
Frontend: React.js, HTML5, CSS3, Responsive & Accessible Web Design
Backend: Node.js, Express.js, FastAPI
Databases: MongoDB, MySQL, MongoDB Atlas, Supabase, Neon
Tools: Git, GitHub, Clerk, VS Code, Vercel, Render
Concepts: REST APIs, JWT Authentication, API Integration

Experience

AI Model Evaluation & Post-Training Intern Feb 2026 – May 2026
Ethara.ai

- Evaluated 1,000+ LLM responses for factual accuracy and reasoning quality using structured evaluation rubrics.
- Delivered detailed annotations that contributed to post-training dataset improvements.
- Worked within engineering-oriented evaluation pipelines, gaining exposure to production AI workflows.

Projects

Advanced Windows Security Application
Java Swing, Python, Batch

- Developed a Windows security application featuring junk cleanup, diagnostics, firewall monitoring, CIS audits, and malware detection.
- Automated troubleshooting workflows using Java, Python, and Batch scripting.

DSA Visualizer
Live Demo

- Built an interactive DSA visualizer using React.js with real-time algorithm animations.
- Implemented visualizations for sorting, searching, linked lists, trees, graphs, and recursion.
- Designed a responsive, accessible interface optimized for desktop and mobile devices.

Shopy – E-Commerce Web Application
Live Demo

- Developed a full-stack MERN e-commerce application.
- Implemented JWT authentication, shopping cart, product management, and REST APIs.
- Built a responsive user interface with a scalable backend architecture.

Pharma Complaint Management System
Live Demo

- Developed a full-stack pharmaceutical complaint management system with Clerk authentication and role-based access.
- Built RESTful APIs for complaint registration, tracking, and management using PostgreSQL on Neon.
- Designed a responsive React.js interface with complaint tracking and CRUD functionality.

Education

Bachelor of Technology in Computer Science & Engineering
University of Engineering and Management, Jaipur 2022 – 2026
Relevant Coursework: Data Structures & Algorithms, Software Engineering, Cloud Computing
