PROFESSIONAL SUMMARY

Entry-level Software Developer with hands-on experience in building responsive web applications using JavaScript, React, HTML, and CSS, along with backend development in Python and Java. Skilled in implementing features, debugging, and writing modular, maintainable code. Strong foundation in programming fundamentals, data structures, and problem-solving. Passionate about continuous learning and enhancing technical expertise through real-world projects and certifications, seeking an entry-level role in software development or frontend engineering where I can contribute, learn, and grow.

TECHNICAL SKILLS

Languages: C, C++, Java (Basic), Python, SQL, JavaScript, HTML/CSS

Frameworks & Databases: React.js, Chart.js, MySQL

Tools & Platforms: Microsoft Excel, Git

Additional Skills: Cybersecurity Fundamentals, Team Collaboration, Communication, Time Management, Leadership, Presentation

PROJECTS

Blog Web Application — HTML, CSS, JavaScript, React.js

- Built a responsive blogging platform with features such as post creation, image uploads, likes, and comments.
- Implemented local storage for saving posts, an automated slideshow, and rotating quotes to enhance user engagement.
- Developed the frontend using React.js with a responsive, component-based layout, handling state and user interactions to deliver a smooth, intuitive experience across devices.

Animated Resume Website — HTML, CSS, JavaScript, React.js

- Designed and developed a visually engaging personal portfolio with smooth scrolling, typing effects, and a fully responsive layout.
- Showcased frontend skills and improved user interaction through animation-driven design.
- Built the site with HTML, CSS, and JavaScript alongside React.js components, demonstrating practical frontend development skills, clean UI implementation, and attention to overall user experience.

PersonaPath — React.js, Node.js, MongoDB, Groq AI (LLaMA 3.3 70B)

- Co-developed a full-stack AI-driven SaaS platform reimagining personality assessment as a continuous process, built on the Big Five (OCEAN) model.
- Built three integrated AI services — a deep personality analyzer, a sentiment-aware reflective journal, and a context-aware AI career coaching chatbot — using React.js, Node.js/Express, and MongoDB Atlas, with JWT authentication and rate limiting; deployed on Netlify and Render at zero infrastructure cost.
- Co-authored an accompanying research paper on the system's architecture and evaluation.

EDUCATION

B.Tech, Computer Science & Engineering — Shivalik College of Engineering 2022 – 2026
Dehradun, Uttarakhand, India

Class XII (PCM) — Maa Saraswati Public Senior Secondary School — 70% 2022
Haridwar, Uttarakhand, India

Class X — Maa Saraswati Public Senior Secondary School — 76% 2020
Haridwar, Uttarakhand, India

CERTIFICATIONS

- Responsive Web Design — freeCodeCamp
- Hands-on React JS — Udemy
- Tata Data Visualization Job Simulation — Forage
- Mastercard Cybersecurity Job Simulation — Forage
