DEEPA TIWARI

Java Backend Developer

Noida, India | 8707871167 | tiwarideepa969@gmail.com | linkedin.com/in/deepa-tiwari-764249216

PROFESSIONAL SUMMARY

Java Backend Developer with 2 years of experience designing, developing, and maintaining scalable backend applications and RESTful APIs using Java, Spring Boot, and GCP. Skilled in translating requirements into technical solutions, integrating APIs and databases, and ensuring application stability through rigorous testing, code review, and defect resolution. Independently designed and delivered a Spring Boot proof of concept integrating Google Cloud Bigtable and Pub/Sub for historical data management, end-to-end from requirements to testing. Contributed to Sabre's airline availability platform, delivering 10+ backend features, resolving 50+ code quality issues, and maintaining 85%+ test coverage across 20+ Agile sprints. Currently deepening Spring Boot expertise through advanced coursework while seeking a full-time backend engineering role.

WORK EXPERIENCE

Software Engineer, Coforge

Aug 2024 – May 2026

Client: Sabre | Greater Noida, India

Project: AVS Outbound — Airline Inventory Availability Platform

- Developed and enhanced 10+ backend features using Java and Spring Boot for Sabre's airline inventory availability platform.
- Built and maintained RESTful APIs enabling communication between distributed backend services.
- Investigated production issues through log analysis and root cause analysis, supporting timely defect resolution.
- Analyzed Spring Boot graceful shutdown behavior through controlled experiments, documenting findings and presenting observations to support reliability improvements.
- Developed 40+ unit and integration test cases using JUnit, achieving 85%+ test coverage and improving application reliability.
- Resolved 50+ SonarQube code quality issues, improving maintainability and ensuring compliance with quality standards.
- Created 15+ pull requests and contributed across 20+ Agile Scrum sprints.

Technologies: Java 17, Spring Boot, REST APIs, GCP Pub/Sub, JUnit, SonarQube, Maven, Git, Docker, IntelliJ IDEA

Project: VIH History-POC — Independent Initiative

- Independently designed and developed a Spring Boot proof of concept from requirement analysis through implementation and testing.
- Developed 5+ RESTful APIs with pagination, sorting, and filtering for efficient retrieval of historical records.
- Integrated Google Cloud Bigtable and GCP Pub/Sub for scalable, event-driven historical data processing.
- Implemented Bigtable filters, Bearer Token authentication, global exception handling, and input validation to improve application security and reliability.
- Developed 30+ unit and integration test cases using JUnit and MockMvc, achieving 85%+ test coverage.
- Used the Bigtable Emulator for local development and testing; owned end-to-end design, development, testing, and delivery.

Technologies: Java, Spring Boot, REST APIs, Google Cloud Bigtable, GCP Pub/Sub, Maven, IntelliJ IDEA, Postman, JUnit, MockMvc

EDUCATION

B.Tech, Computer Science & Engineering (AI/ML) Aug 2020 – Jul 2024

GL Bajaj Institute of Technology and Management, Greater Noida

TECHNICAL SKILLS

Programming Languages: Java 17, Java 8, SQL
Frameworks & Technologies: Spring Boot, Spring Data JPA, Hibernate
Backend: REST APIs, Microservices, Event-Driven Architecture
Web Basics: HTML, CSS, XML
Cloud & Messaging: Google Cloud Platform (GCP), Google Cloud Pub/Sub, Google Cloud Bigtable
Databases: MySQL, NoSQL (Google Cloud Bigtable)
Testing: JUnit, MockMvc, Integration Testing, Postman
API Documentation: Swagger / OpenAPI
Tools & Platforms: Docker, Git, GitHub, Maven, IntelliJ IDEA, SonarQube
Concepts: OOP, SDLC, CI/CD, Exception Handling, Agile Scrum, Root Cause Analysis, Debugging
AI-Assisted Development: ChatGPT, Claude, GitHub Copilot
