PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience across full-stack development and applied AI/ML, backed by strong analytical thinking, problem-solving, and client-focused communication. Skilled at breaking down technical concepts for non-technical audiences, collaborating across teams, and delivering solutions under deadlines. Comfortable working across the full lifecycle of a project — from understanding requirements to debugging and delivering a working product.

CORE COMPETENCIES

Communication & Client Interaction • Analytical & Problem Solving • Team Collaboration • Adaptability • Requirement Analysis • Documentation • Time Management

EDUCATION

Bachelor of Technology in Computer Science *2022 – 2026*
Shivalik College of Engineering

EXPERIENCE

Web Development Intern — Technohacks *Late 2025 · 1 month*

- Collaborated with a small development team to build, test, and debug web pages and features, coordinating priorities and updates within tight timelines.
- Contributed to a resume analyzer tool, working across both front-end functionality and underlying logic — translating requirements into working features.
- Gained hands-on exposure to real-world development workflows, version control practices, and collaborative problem-solving in a team setting.

PROJECTS

CinemaBook — Scalable MERN Ticket Booking Platform | *MongoDB • Express.js • React.js • Node.js • JWT • Razorpay*

- Analyzed end-to-end user needs for an online ticket booking flow and delivered a full-stack platform using the MERN stack with JWT authentication and seat selection.
- Integrated Razorpay payment processing with QR code-based digital ticket generation, ensuring a smooth, reliable user experience.
- GitHub: cinemabook

AI-Powered Project Repository Assistant — Hackathon Project, In Time Tec, Jaipur | *Python • Streamlit • FAISS • Sentence Transformers • LLM Integration*

- Identified a real workflow gap in discovering relevant past projects and built a retrieval-based assistant using FAISS vector search and Sentence Transformer embeddings.
- Built a Streamlit dashboard with filtering, ranking, and recommendation features for easy end-user interaction.
- GitHub: rag-project-intelligence-assistant

AI Study Assistant | *HTML • CSS • JavaScript • Python Flask*

- Designed an AI-assisted learning platform with topic-based quiz generation to support personalized self-assessment.
- Built a responsive interface and integrated a Flask REST API to connect front-end and back-end logic.
- GitHub: ai-study-assistant

Task Manager Web Application | *HTML • CSS • JavaScript*

- Developed a responsive task management system with full CRUD functionality based on everyday user workflow needs.
- Implemented LocalStorage for persistent data handling and a dynamic, intuitive interface using DOM manipulation.
- GitHub: task-manager-web-app

TECHNICAL SKILLS

Languages: Python, JavaScript, C++
Web Technologies: React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, Flask, Streamlit
Databases & Tools: MongoDB, SQLite, Git, GitHub, Docker, GitHub Actions, VS Code, Postman, Linux
AI / ML & Concepts: LangChain, Groq LLM, FAISS, Sentence Transformers, RAG, Prompt Engineering, REST APIs, CRUD Operations, OOP, Data Structures

CERTIFICATIONS

Web Development Bootcamp — CodeHelp (2026) • IBM Web Development Fundamentals Certification • Agile Scrum Developer Certification — Advanced Software Engineering Job Simulation
