Education

JSS Academy of Technical Education — Noida, U.P.
B.Tech in CSE (Data Science) — *Aug. 2022 – June 2026*

Gopal Public School — Sultanpur, U.P.
Class XII — *2021*

Stella Maris Convent School — Sultanpur, U.P.
Class X — *2019*

Experience

Logics Network Institute of Technology (LNIT) — July 2025 – Dec. 2025
Data Analytics Intern

- Analyzed structured datasets using Python, SQL, Excel, and Power BI to identify trends, patterns, and actionable insights for analytical decision-making.
- Performed data cleaning, preprocessing, transformation, and exploratory data analysis (EDA) to improve data quality and prepare datasets for reporting and visualization.
- Developed interactive Power BI dashboards using KPIs, DAX, charts, filters, and slicers, and wrote SQL queries for extraction, aggregation, filtering, and analysis.

Projects

RAGVault - Full-Stack RAG Application for PDF Document Q&A
Python, FastAPI, Streamlit, LangChain, LlamaParse, Pinecone, Groq, Gemini

- Built a modular FastAPI backend for PDF ingestion, document processing, semantic retrieval, and context-grounded question-answering using RESTful APIs.
- Implemented LlamaParse extraction and Recursive Character TextSplitter chunking, generated 768-dimensional embeddings, and stored vectors in Pinecone for top-k similarity search.
- Built a LangChain RAG pipeline with Groq LLM inference and anti-hallucination prompts, alongside a Streamlit chat interface supporting multi-file uploads, session state, and source-grounded responses.

LinkedIn Persona Analyzer
Python, FastAPI, React, LangChain, Playwright, Gemini AI, SSE, Docker, Pydantic

- Processed 10+ scraped LinkedIn profile sections through LangChain and Gemini Flash to generate a Big Five (OCEAN) personality report with 0–100 trait scores and an interactive radar chart.
- Implemented a 3-tier browser session workflow using cookie authentication, saved browser state, and credential login fallback, reducing scraper startup time by approximately 70%.
- Streamed real-time pipeline progress to the React frontend using Server-Sent Events (SSE), with Pydantic validation and Docker-based containerization for consistent deployment.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, SQL
AI / LLM: RAG, LangChain, Prompt Engineering, Embeddings, Vector Search, Structured Outputs
Data Engineering: ETL, Data Cleaning, Data Preprocessing, EDA, Data Transformation, Data Modeling, KPI Analysis
Python / Analytics: Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook
Backend & Databases: FastAPI, Pydantic, Node.js, Express.js, REST APIs, SSE, Logging, MongoDB, MySQL
Frontend / Automation: Streamlit, React.js, Tailwind CSS
Cloud / DevOps: Docker, Microsoft Azure, Git, GitHub, Postman

Certifications

Data Analytics Bootcamp From Basic to Advance: Udemy
Advanced SQL: HackerRank
Data Structures and Algorithms using Java: Coding Blocks
Aurora Hackathon: Humanity Founders
Machine Learning: Udemy
Generative AI: Simplilearn
GenAI-Powered Data Analytics: Tata
