ADARSH DIXIT

Software Developer

Greater Noida, India | +91 9569522432 | adarshdixit998@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Developer with a strong foundation in data structures, algorithms, and object-oriented design, and hands-on experience building, debugging, and optimizing full-stack and backend systems. Comfortable working across the stack — from REST APIs and relational databases to distributed, containerized, message-driven services — with a consistent record of improving performance, reliability, and maintainability. Quick to pick up new tools, frameworks, and languages, with solid fundamentals in system design and clean coding practices, and experienced collaborating in Agile team environments to ship production-quality software on schedule.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript
Systems & Concepts: Data Structures, Algorithms, OOP, Debugging, System Design, Performance Optimization, Testing & Code Quality
Backend & Data: Flask, Express.js, Spring Boot, REST APIs, MySQL, PostgreSQL, Apache Kafka, Redis
Frontend: React, HTML, CSS, Bootstrap
Cloud & Tools: AWS (EC2, S3, Lambda), Docker, CI/CD, Git, GitHub, VS Code

WORK EXPERIENCE

Web Developer Intern — CodeSoft (Remote) *Jun 2024 – Jul 2024*

- Built reusable, responsive UI components in React, debugging cross-browser rendering issues to improve visual consistency and page-load performance
- Integrated REST APIs to fetch and display dynamic data efficiently, collaborating within an Agile team workflow of stand-ups, sprint reviews, and code reviews

Java Trainee — Codules *Sep 2024 – Oct 2024*

- Completed intensive training in Core Java, OOP, Data Structures & Algorithms, and JDBC, applying industry coding standards and best practices
- Built and debugged console- and GUI-based applications, strengthening systematic problem-solving, root-cause analysis, and testing skills

PROJECTS

DataStream Pro — Enterprise Real-Time Analytics Platform — *datastream-pro-dashboard-v2.onrender.com*
Python, Django, Apache Kafka, Redis, Docker, PostgreSQL, AWS (EC2, S3, Lambda), Scikit-learn

- Architected a distributed, microservices-based platform processing 1M+ streaming events daily using Kafka for ingestion and Redis for low-latency caching
- Built ML-driven anomaly detection and forecasting models with Scikit-learn, improving decision accuracy by 30% and enabling proactive alerting on abnormal trends
- Containerized services with Docker and deployed on AWS with automated CI/CD pipelines, achieving 99.9% uptime and 40% faster releases through performance tuning
- Designed a scalable PostgreSQL schema with indexing and query optimization to support high-throughput read/write operations under real-time load

BankEase — Banking Management System — *bankease-live-final.onrender.com*
Java, Spring Boot, MySQL, REST APIs, JWT Authentication

- Designed a secure, layered-architecture system for account creation, transactions, and fund transfers following separation-of-concerns principles
- Implemented JWT authentication and role-based access control (RBAC) to enforce fine-grained permissions across customer and admin roles
- Optimized transactional MySQL queries and added constraint-level validation to ensure data integrity, consistency, and speed under concurrent access

Krishi Mitra — AI Agriculture Assistant — *krishi-neuron.vercel.app*
React, Express.js, ML Models, APIs

- Built an AI-powered platform for crop recommendations, plant disease detection, and market price prediction, backed by a scalable Express.js API layer
- Integrated trained ML models to analyze crop and soil data, helping farmers make informed decisions on sowing, treatment, and selling strategies

Jarvis AI — Voice-Activated Personal Assistant — *adarshdixit989.github.io/Jarvis-AI*
Python, Speech Recognition, Pyttsx3, OpenAI API/LLM, OS Automation

- Developed a voice assistant that automates OS-level tasks — opening applications, running web searches, and managing files — via speech recognition and text-to-speech
- Integrated the OpenAI API/LLM to handle natural-language queries, extending the assistant's capabilities beyond a fixed set of voice commands

EDUCATION

B.Tech in Computer Science — Mangalmay Institute of Engineering and Technology, Greater Noida *Sep 2022 – Jul 2026*

- Class Representative — coordinated between faculty and students, and helped organize departmental technical events
