PROFESSIONAL SUMMARY

AI/ML-focused Information Technology graduate with hands-on experience in Python, SQL, Machine Learning, Data Analytics, Power BI, Generative AI, and Microsoft Azure. Skilled in data preprocessing, predictive modeling, NLP, LLMs, and dashboard development. Experienced in developing AI-driven solutions through academic projects and industry job simulations. Strong problem-solving, communication, and stakeholder management skills with a keen interest in building scalable AI/ML solutions using cloud technologies.

SKILLS

- **Languages:** Python, SQL, C++, DSA
- **AI/ML:** Machine Learning, Deep Learning ,NLP, LLM , Generative AI, Scikit-learn
- **Database:** MySQL, PostgreSQL
- **Cloud:** Microsoft Azure, Azure Storage, Azure SQL Database, Azure Virtual Machines
- **Data Analytics:** Pandas, NumPy, Matplotlib, Seaborn, Microsoft Excel, Power BI
- **Platforms:** Jupyter Notebook, Visual Studio Code, Git, GitHub
- **Soft Skills:** Rapport Building, Strong Stakeholder management, People Management, Excellent communication

PROJECTS

1. **Heart Disease Prediction**

   Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

   - Developed a machine learning model to predict heart disease using clinical patient data.
   - Performed data preprocessing, feature engineering, and exploratory data analysis (EDA).
   - Trained and evaluated multiple classification models, achieving 89% prediction accuracy.
   - Visualized model insights and performance using Matplotlib and Seaborn.

2. **AI-Powered Resume Screening System**

   Technologies: Python, NLP, Scikit-learn, LLM, Pandas

   - Developed an AI-powered resume screening system using Natural Language Processing (NLP) and Machine Learning.
   - Built a resume-job matching model that achieved 92% matching accuracy based on skill similarity.
   - Automated resume ranking by extracting key skills and matching them with job descriptions.
   - Improved screening efficiency by reducing manual resume evaluation time by 70%.

3. **IPL Data Analytics Dashboard**

   Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

   - Developed a machine learning model to predict IPL match winners using historical match data and player statistics.
   - Performed data preprocessing, feature engineering, and exploratory data analysis (EDA).
   - Trained and evaluated multiple classification models, achieving 91% prediction accuracy with the best-performing model.
   - Visualized team performance and match insights using Matplotlib and Seaborn.

EDUCATION

Bachelor of Technology, Deen Dayal Upadhyaya Gorakhpur University , Gorakhpur *2025*

Specialization: Information Technology

CERTIFICATIONS

GenAI Powered Data Analytics (Tata Group) | *Link*

- Completed an AI-powered data analytics job simulation, performing exploratory data analysis (EDA) and developing a predictive framework for customer delinquency risk assessment.
- Designed an AI-driven collections strategy using Generative AI, automation, and ethical AI principles to support scalable business decision-making.

Data Analytics (Deloitte) | *Link*

- Completed a data analytics and forensic technology job simulation, performing data analysis and business problem-solving using Excel.

- Developed an interactive Tableau dashboard and generated actionable business insights through data classification and visualization.

Software Engineering (Commonwealth Bank) | *Link*

- Completed a full-stack software engineering simulation, enhancing backend (.NET, C#, MongoDB) and frontend (React, Redux, TypeScript) functionality using Git.
- Developed and tested scalable features with C#, xUnit, Postman, GitHub, applying unit testing and software development best practices.

Big Data Program (Samsung Innovation Campus) | *Link*

- Completed hands-on training in Big Data fundamentals, data processing, and analytics using Python and SQL.
- Gained practical experience in ETL processes, data visualization, and data-driven decision-making through real-world datasets.
