SUMMARY

Computer Science Engineering graduate specializing in Generative AI and AI Engineering, with 3 months of professional experience building AI-driven automation systems. Hands-on experience developing RAG applications, LLM workflows, REST APIs, and backend systems using Python, FastAPI, LangChain, ChromaDB, and SQL. Strong interest in building reliable AI workflows, retrieval systems, and production-oriented backend infrastructure.

SKILLS

Programming:	Python, SQL
Generative AI:	LLMs, RAG, LangChain, Prompt Engineering, ChromaDB, Vector Databases, Ollama
Backend & APIs:	FastAPI, REST APIs, API Development, Backend Development
Machine Learning:	Scikit-learn, XGBoost, LightGBM, CatBoost, Feature Engineering, Model Evaluation
Data:	Pandas, NumPy, Data Processing, Time Series Forecasting
Tools:	Git, GitHub, VS Code, Jupyter Notebook, Anaconda

EXPERIENCE

AI & SEO Intern|Ubuy — Sept 2025 - Dec 2025

Jaipur, Rajasthan, India

- Developed an AI-driven content automation system using Python and LLM-based workflows, generating 500+ SEO-optimized pages and reducing manual content creation time by 80%.
- Built scalable Python-based automation workflows for AI-powered content generation and collaborated with cross-functional teams to improve search visibility, indexing efficiency, and content scalability.

PROJECTS

Multi-PDF Research Assistant

Python|FastAPI|REST APIs|Streamlit|LangChain|ChromaDB|SQLite|Ollama|RAG

- Built an end-to-end RAG application for conversational querying across multiple PDF documents using LangChain, ChromaDB, and Ollama.
- Developed FastAPI REST APIs for document retrieval, metadata filtering, database integration, and context-aware response generation.
- Implemented document ingestion, chunking, embedding generation, semantic retrieval, and context construction for multi-document question answering.

Real-Time Trading Bot

Python|Binance API|WebSockets|SQLite|Pandas|REST APIs

- Developed a Python-based trading system integrating REST APIs and WebSocket streams for real-time market data ingestion and automated order execution.
- Implemented SQLite-based trade persistence, structured logging, and configurable risk-management modules for reliable trading workflows.

Infrared Thermography Temperature Prediction

Python|Scikit-learn|TensorFlow|Random Forest|HistGradientBoosting|CatBoost|LSTM|LASSO|LIME

- Engineered a body-temperature prediction framework using a clinical infrared thermography dataset containing 2,000+ thermal observations from over 1,000 participants and 26 facial temperature features.
- Achieved R^2=0.846, MAE=0.108°C, and RMSE=0.149°C with Random Forest; applied LIME for model interpretability and performance analysis.

RESEARCH AND PUBLICATIONS

Nonlinear Regression Analysis Using Fick's Law Algorithm — ICAHTE 2024, UEM Jaipur

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering (AI & ML)

University of Engineering and Management, Jaipur — 2022 – 2026

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Python for Data Science – NPTEL (IIT)
- Database Management Systems – NPTEL (IIT)
- The Joy Of Computing Using Python – NPTEL
- Linguaskill Cambridge English
