EDUCATION

MJP Rohilkhand University — Bareilly, India
Bachelor of Technology in Computer Science and Information Technology (CSIT) — 2021– 2025
CGPA: **9.00**

Holy Angles' School — Shahjahanpur, India
ICSE; Senior Secondary (12th): **78.2%** — 2020-2021
Holy Angles' School — Shahjahanpur, India
ICSE; Secondary (10th): **72.8%** — 2019-2020

SKILLS

Languages: Python, SQL, C++, Core Java, HTML, CSS, Javascript.
Database Management: MySQL, PostgreSQL, SQL Server.
Developer Tools: MS Excel, SQL Workbench, VS Code, Jupyter Notebook, Git/GitHub, Power BI.
Libraries: NumPy, Pandas, Matplotlib, Seaborn, scikit-learn, Plotly.
Coursework: Operating System, Database Management Systems, Computer Network, Statistics.
Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Communication, Strategy.

PROFESSIONAL EXPERIENCE

Data Analyst — **AA Revenue Optimizers, Noida (Sep 2025- Present)**

- Developed and maintained financial, user, and production dashboards for clients using Power BI and Excel.
- Created interactive reports and visualizations to support business decision-making and performance tracking.
- Maintained and updated financial reports to ensure data accuracy and timely reporting for clients.
- Analyzed large datasets to identify trends, patterns, and business insights.
- Performed data cleaning, validation, and transformation to improve data quality and reporting efficiency.
- Collaborated with cross-functional teams to gather business requirements and deliver customized reporting solutions.
- Automated recurring reports and dashboard processes to reduce manual effort and improve productivity.
- Monitored key performance indicators (KPIs) and generated actionable insights for stakeholders.
- Wrote SQL queries to extract, manipulate, and analyze data from multiple databases.
- Assisted in preparing business reports, presentations, and ad-hoc data analysis requests.
- Supported data-driven strategies by providing accurate and meaningful analytical reports.
- Ensure confidentiality and integrity of client data while handling reporting and analytics tasks.

PROJECTS

Grocery Inventory Scraper (Zepto) |Python, Selenium, MongoDB Atlas, ETL |link

- Designed and implemented a real-time ETL pipeline to scrape grocery product data from Zepto and ingest into **MongoDB Atlas**.
- Processed and stored **5000+ unique** grocery products in JSON format, enabling efficient querying, indexing, and schema flexibility.
- Built a price tracking feature to capture the **latest updated price** and maintain historical changes for trend analysis.
- Developed **robust** data cleaning and transformation modules to handle inconsistent product attributes, pricing variations, and availability status.

Madhav Ecommerce Sales Dashboard |Power BI, Power Query Editor, DAX |link

- Developed an interactive Power BI dashboard analyzing **500+ orders** and **1,500+ transaction** records to uncover key insights on sales, profit, and customer behavior across regions and product categories.
- Developed advanced **DAX** measures for KPIs like Average Order Value, profit trends, and customer segmentation, enabling decision-makers to target high-value customers and optimize seasonal campaigns.
- Designed and implemented insightful visualizations to reveal category-level sales dominance (e.g., **62.62% Clothing**), regional profitability leaders (**Uttar Pradesh**), and high-performing sub-categories (**Printers, Bookcases**), resulting in data-backed business strategy recommendations.

Stock Market Pipeline (ETL) |SQL, Pandas, API |link

- Build the stock market data pipeline for analysis by fetching the data **from API.**
- Prepare the data by cleaning and **transforming** its value into **numeric** form.
- Run the SQL command to build the connection with **the database.**

Bike Sales Dashboard in Excel |Excel, Pivot Table |link

- Cleaned, organized, and visualized **100% of data**.
- Analyze diverse real-world Bike Sale dataset consisting of over **1000+ people's data in Excel**, expertly utilizing a wide range of formulas, function and pivot tables.
- Developed impactful Excel dashboards to communicate crucial insights, driving a 60% increase in business growth.

Delhi Metro Analysis in Python |Python, plotly, Visualization |link

- Conducted data analysis on the Delhi Metro system using Python, Pandas, and Folium to visualize station locations and connectivity.
- Investigated the distribution of Delhi Metro stations across different lines to identify **potential transport patterns**.
- Developed the **interactive map** of metro stations using **folium** library in python.
- Utilized data-driven insights to propose optimizations for future metro expansions and improved passenger flow management.
