SHUBHAM PAL

SUMMARY

Cybersecurity Enthusiast with hands-on experience in VAPT, OWASP Top 10 and SOC through multiple internships. Skilled in web application security, penetration testing, and networking fundamentals. Strong analytical and communication skills with eagerness to learn and contribute to Information Technology sector.

EDUCATION

ABES Institute of Technology
Bachelor's Degree in CSE (Data Science)
2026

Intermediate
PHM School (CBSE Board)
2020

High school
J.K.G School (CBSE Board)
2018

SKILLS

- Web Application Security
- Networking fundamentals
- Penetration Testing
- Cyber Security
- Bug Reporting
- Kali Linux (Command Line)
- Information Security
- SIEM
- EDR / XDR
- Log Analysis
- HTML/CSS
- Python

CERTIFICATIONS

- GoogleCyber Security Professional certificate (Coursera)
- Fundamental of Cyber Security (CISCO netacad)
- Machine Learning from basics to advanced (Udemy)

HOBBIES

- Play Cricket
- Workout and Gym

Other Projects :-

Keylogger
Password strength checker
Real estate price prediction system Port scanning tool
Log Analysis

PROFESSIONAL EXPERIENCE

Cyber Security Internship (APCSIP 2026)

Amroha Police (Uttar Pardesh Police) | 06/2026

- Gained practical exposure to Cyber Threat Intelligence (CTI), Digital Forensics, Mobile Forensics, Malware Analysis and SOC operations through hands-on labs and expert-led technical sessions.
- Applied OSINT, Attack Surface Management, phishing investigation, and threat analysis techniques to understand real-world cybercrime investigation workflows.
- Strengthened knowledge of SIEM, EDR/XDR, digital evidence handling, incident response, cyber law, and security monitoring aligned with enterprise and law-enforcement environments.
- Worked with modern cybersecurity concepts including MITRE ATT&CK, threat hunting, malware investigation and defensive security best practices.

Cyber Security Instructor

Where U Elevate | 10/2025 - 11/2025

- Delivered cybersecurity training sessions to final-year students as part of my role as a Cybersecurity Instructor at Where U-Elevate.
- Conducted modules on penetration testing (WAPT), SOC fundamentals, Cloud, incident response, and hands-on tools like Nmap, Burpsuite, and Wireshark.
- Assisted students with practical application, lab walkthroughs, and industry readiness.

CyberSecurity Internship

Detox Technologies | 05/2025 - 08/2025

- Executed advanced reconnaissance methodologies using tools such as Subfinder, Amass, Shodan, and Nuclei to identify infrastructure, enumerate subdomains, and gather intelligence on live targets.
- Conducted end-to-end vulnerability assessments on multiple production-grade web applications, applying both automated scanning and manual testing techniques in line with the OWASP Top 10 framework.
- Performed exploitation and proof-of-concept development for identified vulnerabilities, documenting findings with CVSS scoring and recommended remediation steps.
- Assessed authentication mechanisms, session management, access controls, and API security, uncovering issues such as broken access control, CSRF, session flaws, and rate-limiting gaps.

(DFIR) Internship and Training

IIMT GROUPS | 06/2024 - 08/2024

- Performed basic incident response tasks including log analysis, traffic inspection using Wireshark, and identifying indicators of compromise (IoCs).
- Leveraged Burp Suite to identify and exploit web application vulnerabilities such as SQL injection, XSS and CSRF.
- Employed Wireshark for digital forensics and incident response, examining network traffic.

PROJECT

Vulnerability Scanner (July 2024 - December 2024)

- Developed a web vulnerability scanner using PHP to identify security weaknesses in web applications.
- Leverages regular expressions to scan website content for patterns indicative of common vulnerabilities like SQL injection and XSS.
- Presents scan results in a user-friendly table format, highlighting potential security risks. Utilizes PHP scripting and knowledge of web security principles.
