UTTKARSH MISHRA

DATA ANALYST | BUSINESS ANALYTICS | BUSINESS INTELLIGENCE

India | 8587856914 | mishrauttkarsh747@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Analytics-focused Computer Science student with hands-on experience in SQL, Python, Power BI, and data visualization. Skilled in exploratory data analysis, KPI reporting, business intelligence dashboarding, statistical analysis, data cleaning, and business insight generation. Strong foundation in machine learning and automation using n8n, REST APIs, LLM workflows, and Google Sheets. Seeking Data Analyst, Business Analyst, or Business Intelligence internship opportunities.

EDUCATION

Bachelor of Technology, Computer Science and Engineering – Artificial Intelligence & Machine Learning

Galgotias University, Greater Noida, India | Expected Graduation: 2029 | CGPA: 8.32/10

Relevant Coursework: Data Structures and Algorithms, Machine Learning, Python, SQL, Data Analytics, Database Management Systems, Statistics

TECHNICAL SKILLS

Programming & Querying: Python, SQL, C, C++

Data Analysis & Preparation: Pandas, NumPy, Excel, Data Cleaning, EDA, Statistical Analysis, Data Validation, Data Transformation, Customer Analytics, Business Analysis

Visualization & BI: Power BI, DAX, Matplotlib, Seaborn, Dashboard Development, KPI Reporting, Data Storytelling, Business Intelligence

Machine Learning: Scikit-learn, Linear Regression, Decision Trees, Train/Test Split, Model Evaluation, Data Preprocessing, Feature Engineering, Post-Pruning, Predictive Modeling

Databases & Platforms: MySQL, Microsoft Fabric, OneLake

Automation & Integration: Git, n8n, REST APIs, LLM Workflows, Google Sheets

PROJECTS

Uber Ride Analytics Dashboard

Power BI, SQL, Excel, Data Visualization | 150,001 records | GitHub Repository

- Analyzed 150,001 ride-hailing transaction records to evaluate trip completion, driver and customer cancellations, revenue metrics, and operational KPIs.
- Cleaned and transformed raw transactional data to improve consistency, accuracy, and business readiness.
- Developed interactive Power BI dashboards with KPI cards and business-focused visualizations for performance monitoring.
- Translated analytical findings into decision-ready insights focused on operational performance and customer behavior.

Quantium Retail & Customer Analytics

Python, Pandas, NumPy, Seaborn, Matplotlib, Excel | 264,837 records

- Analyzed 264,837 customer transaction records to identify purchasing patterns, customer behavior trends, and category-level opportunities.
- Performed data cleaning, exploratory data analysis, customer segmentation, and transaction-level trend analysis using Python and Pandas.
- Created visualizations using Seaborn and Matplotlib to communicate customer characteristics, purchasing behavior, and business recommendations.

Customer Shopping Behavior – Purchase Prediction

Python, Pandas, Scikit-learn, Linear Regression | GitHub Repository

- Built an end-to-end machine learning pipeline to predict customer purchase amount from shopping behavior data.
- Applied imputation, categorical encoding, feature transformation, ColumnTransformer, and Pipeline for structured preprocessing.
- Implemented train/test split and Linear Regression to establish a predictive modeling workflow and evaluate model performance.
- Interpreted model features from a customer analytics perspective to connect predictive insights with purchasing behavior.

Decision Tree Classification & Post-Pruning

Python, Pandas, Scikit-learn, Matplotlib

- Implemented a Decision Tree classification workflow with model training, train/test split, and performance evaluation.
- Generated predictions for existing and new observations to demonstrate model inference and decision-making.
- Applied post-pruning concepts to reduce tree complexity, minimize overfitting, and improve generalization.
- Visualized decision-tree structures and analytical results using Matplotlib.

AI Job Matching & Resume Analysis Automation

n8n, Python/JavaScript, REST APIs, LLMs, Google Sheets

- Designed an n8n workflow to collect job postings, extract structured job details, and compare candidate profiles against role requirements.
- Implemented matching logic across role fit, technical skills, experience, projects, education, and overall match scoring.
- Automated job filtering, candidate-job matching, and eligibility determination using structured JSON outputs and decision rules.
- Integrated API calls, LLM processing, batching, delays, and Google Sheets storage for scalable job-search automation.

CERTIFICATIONS & JOB SIMULATIONS

- Deloitte Data Analytics Job Simulation | Forage — Completed June 15, 2026 | Data Analysis, Forensic Technology
- Quantium Data Analytics Job Simulation | Forage — Completed June 19, 2026 | Data Preparation & Customer Analytics, Experimentation & Uplift Testing, Analytics & Commercial Application
- OOPS using C++ | GUVI, HCL — Completed May 30, 2026
- C Programming Interview QnA | GUVI, HCL — Completed December 1, 2025
- C Programming | GUVI, HCL — Completed November 29, 2025
- Computational Thinking | GUVI, HCL — Completed November 30, 2025
