Haryana, India | Open to Remote & Delhi NCR Opportunities

PROFESSIONAL SUMMARY

Entry-level Frontend Developer skilled in HTML, CSS, JavaScript (ES6+), REST APIs, and LocalStorage. Built 4 responsive web applications including an e-commerce platform, mental wellness app, weather forecast app, and scientific calculator. Strong in DOM manipulation, API integration, and creating user-focused interfaces. Passionate about learning modern frontend technologies. Currently expanding my skills in React.js.

EDUCATION

Bachelor of Technology (B.Tech) – Information Technology Expected Graduation: 2026

Raj Kumar Goel Institute of Technology and Management (AKTU)

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems

TECHNICAL SKILLS

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+)

Web Development Concepts: Responsive Web Design, DOM Manipulation, REST APIs, Fetch API, LocalStorage, Async/Await, JSON Handling, Cross-Browser Compatibility

Tools & Version Control: Git, GitHub, VS Code, Chrome DevTools

Currently Learning: React.js

PROJECTS

MindEase – Mental Wellness Web Application (Prototype)

- Developed a responsive mental wellness web application integrating emotion-detection APIs, self-assessment modules, and personalized dashboard insights.
- Implemented productivity-focused features including Pomodoro timer, thought-reframing exercises, and cognitive mini-games using JavaScript and LocalStorage.
- Designed an interactive user interface focused on accessibility, engagement, and user experience.

ShopSphere – E-Commerce Frontend Application

- Built a responsive e-commerce application featuring product search, category filtering, cart management, wishlist functionality, and dark/light theme switching.
- Implemented LocalStorage–based persistence to maintain user preferences and shopping data across sessions.
- Developed dynamic UI components using JavaScript with a focus on performance and user experience.

SkyCast – Weather Forecast Application

- Developed a weather forecasting application integrating REST APIs to provide real-time weather updates and 5-day forecasts.
- Implemented worldwide city search, browser geolocation support, and robust error handling for API failures.
- Designed a fully responsive interface optimized for desktop and mobile devices.

CalcPro – Scientific Calculator

- Built a scientific calculator supporting advanced mathematical operations, keyboard shortcuts, calculation history tracking, and theme customization.
- Implemented JavaScript-based computation logic and LocalStorage persistence for improved usability.
- Enhanced user experience through responsive design and efficient event handling.

CERTIFICATIONS

- Data Structures & Algorithms with Java – Apna College
- Python Bootcamp – Apna College
